LEAN PARTNERS

Lean Leader Certification Training

DEVELOPMENT WITH RESULTS.

Lean initiatives fail when the right combination of mindset, skills, and tools are inadequate. Many people think 5S is going to transform their culture into a Lean culture. The reality is that there are many tools in the Lean toolbox and knowing which tool to use when for your organization is extremely important.

In this certification program you will learn and practice using the most commonly used tools in the Lean toolbox. You will learn how to create a Lean Strategy for your organization including where to start and which tools are most important for your organization's journey. A project after the 5-day training is required for certification.

Features

- 5 days of applied learning through exercises and simulation
